

Protection and rehabilitation of an area of the Black Sea coast near Constanta

Data and facts

Company	JV PORR Bau GmbH, FRANCO GIUSEPPE SRL, DINAMICA SRL
Type	Hydraulic engineering & harbours
Runtime	08.2013 - 10.2015
Principal	ABADL – Dobrogea-Litoral Basin Water Administration

[Project report online](#)

Intelligent building protects the shoreline.

The highlight was the enlargement of the beach by beach nourishment. The sand for this replenishment was dredged from a spot 10km off the coast, at a depth of 30m.

Even during the construction time, the public beach was open for festival season.

Impressions

Image notes

1

Dividing the waters.

Existing breakwaters were consolidated and new groynes and connection structures were installed in the course of this project.

2

Beach nourishment in progress.

Beach nourishment, also called beach replenishment, is the practice of adding large quantities of sand to beaches to combat erosion and increase beach width.
