Special sites call for special measures.

To ensure a continuous concrete supply flux with the same permanent quality, it was necessary to install an extra concrete plant on-site. Another special challenge was posed by the ground conditions in the construction field. The construction team solved this issue by using different lengths from 12 to 20m and different numbers of concrete-driven piles.

Impressions

Image notes

1

For a clean energy future.

Wind farm Corni's 35 wind turbine generators produce a total output of 70MW.

2

Rising sky-high.

The construction of crane pads and deep foundations for 35 WTGs was executed by PORR.
